

## **Verve Therapeutics to Participate in the Guggenheim Genomic Medicines and Rare Disease Conference**

March 24, 2022

CAMBRIDGE, Mass., March 24, 2022 (GLOBE NEWSWIRE) -- [Verve Therapeutics](#), a biotechnology company pioneering a new approach to the care of cardiovascular disease with single-course gene editing medicines, today announced that Andrew Bellinger, M.D., Ph.D., chief scientific officer and chief medical officer, will participate in a fireside chat during the virtual Guggenheim Genomic Medicines and Rare Disease Conference on Thursday, March 31, 2022 at 10:00 a.m. ET.

A live webcast will be available in the investor section of the company's website at [www.vervetx.com](http://www.vervetx.com). The webcast will be archived for 60 days following the presentation.

### **About Verve Therapeutics**

Verve Therapeutics, Inc. (Nasdaq: VERV) is a genetic medicines company pioneering a new approach to the care of cardiovascular disease, transforming treatment from chronic management to single-course gene editing medicines. The company's initial two programs target PCSK9 and ANGPTL3, genes that have been extensively validated as targets for lowering blood lipids such as low-density lipoprotein cholesterol (LDL-C), a root cause of cardiovascular disease. Verve's lead product candidate, VERVE-101, is designed to permanently turn off the PCSK9 gene in the liver in order to disrupt blood PCSK9 protein production and thereby durably reduce blood LDL-C levels, with the goal of reducing a patient's risk for cardiovascular disease. VERVE-101, currently in IND-enabling studies, is being developed initially for the treatment of patients with heterozygous familial hypercholesterolemia, a potentially fatal genetic heart disease. For more information, please visit [www.VerveTx.com](http://www.VerveTx.com).
